## Windows Installation

**Note: Connect the adapter to your computer before installing the driver!**

**Windows10 (32-/64-bit) / Windows 8 (32-/64-bit) / Windows 7 (32-/ 64-bit) / Server 2008 R2**

1. Insert of the driver CD.
2. Right click **computer** and click **Manage**.
3. Click **Device Manager**, double click **other devices**, depending on the model purchased, there will be either 4 or 8 **Unknown devices** displayed.
4. Right click the first listed **Unknown device**, and click **Update Driver Software**.
5. In the dialog box that appears, click **Browse my computer for driver software**.
6. Browse to folder **x86** or **x64** on the driver CD, and click **Next**.

**Note: Use x86 folder for 32-bit systems and x64 folder for 64-bit systems.**

7. The installation for one serial port is finished.
8. Repeat steps 4 through 7 for the remaining **Unknown device(s)** to complete the driver installation. **Important:** Select the **Unknown device** in the order that they appear.

9. The Industrial USB to RS-232 Serial is ready for use.

### **Windows Vista (32-/64-bit)**

1. Insert the driver CD.
2. At the **Found New Hardware** window, click **Locate and install driver software (recommended)**.
3. Click **Browse my computer for driver software (advanced)**.
4. Browse to folder **x86** or **x64** on the driver CD, and click **Next**. **Note: Use x86 folder for 32-bit systems and x64 folder for 64-bit systems.**
5. Click **Close** to complete the installation.

### **Windows XP (32-/64-bit) / Server 2008 (32-/ 64-bit) / Server 2003 (32-/64-bit)**

1. Insert the driver CD.
2. At the **Found New Hardware Wizard** window, click **Next**.
3. Choose **Install from a list or specific location (Advanced)**, and click **Next**.
4. Browse to folder **x86** or **x64** on the driver CD, and click **Next**.  
**Note: Use x86 folder for 32-bit systems and x64 folder for 64-bit systems.**
5. Click **Finish** to complete the installation.

### **Windows Server 2012 / 2012R2**

1. Insert the driver CD.
2. Right click **Start**, and click **Device Manager**.
3. Double click **Other devices**. Depending on the model purchased, there will be either 4 or 8 **Unknown devices** displayed.

4. Right click the first listed **Unknown device**, and click **Update Driver Software**.
5. In the dialog box that appears, click **Browse my computer for driver software**.
6. Browse to folder **x86** or **x64** on the driver CD, and click **Next**. **Note: Use x86 folder for 32-bit systems and x64 folder for 64-bit systems.**
7. The installation for one serial port is finished.
8. Repeat steps 4 through 7 for the remaining **Unknown device(s)** to complete the driver installation. **Important:** Select the **Unknown device** in the order that they appear.
9. The Industrial USB to RS-232 Serial is ready for use.

## To Verify Windows Installation

1. Go to Device Manager to verify installation.  
For Windows 10 / Windows 8 / Windows 7 / Windows XP / Server 2003 & 2008 R2/ 2000: Right click **Computer** or **My Computer**, click **Manage**, then click **Device Manager**.  
For Windows Vista: Right click **Computer**, click **Manage**, click **Continue**, then click **Device Manager**.  
For Server 2008: Right click **Computer**, click **Manage**, then double click **Diagnostics**, and click **Device Manager**.  
For Server 2012/ 2012 R2: Right click **Start**, and click **Device Manager**.
2. Double click **Ports(COM & LPT)**. The new COM ports should be displayed.
